Errors in the units for magnetoresistance (MR) and the entropy change ($\Delta S$) in figure 5(b) and (c) were noticed after the publication of the article. A corrected version of figure 5 is given. The conclusion of the article is not affected by this error.

Figure 5. (a) Electrical resistivity as a function of temperature in zero field and at 50 kOe field. The inset shows the same scenario up to 30 K. (b) MR behavior of the sample as a function of the field at different temperatures. (c) Isothermal entropy change as a function of the field at the corresponding temperature. The lines through the data points are guides to the eyes.
