**Corrigendum**

**Photon-emission rate from atomic systems in the CSL model**  

The use of the term ‘power’ and the symbol $P$ in equations (20), (21), (36), (38), (39), (42), (43), and (55) was inadvertent; we should have used the term ‘rate’ and the conventional symbol $\Gamma$. These formulas all give the photon radiation rate, and do not include the energy per photon factor $\hbar c \nu$ needed to convert them to radiated power. We wish to thank Angelo Bassi for pointing this out to us.
