Contents

Acknowledgements	vii
Author biographies	viii
1 Skin aging and photoaging	1-1
1.1 Clinical features and histological changes	1-1
References	1-4
2 Primary prevention for skin photoaging	2-1
2.1 Photoprotection	2-2
2.2 Behavioral modification	2-3
References	2-3
3 Secondary prevention for skin photoaging	3-1
3.1 Topical retinoids	3-1
3.2 Antioxidants	3-6
References	3-10
4 Minimal invasive treatment	4-1
4.1 Botulinum toxin and intradermal fillers	4-1
4.2 Chemical peels	4-2
References	4-6
5 Laser and light treatment for skin photoaging	5-1
5.1 Ablative laser systems	5-1
5.2 Nonablative laser systems	5-4
5.3 Photodynamic therapy	5-5
References	5-6
6 Radiofrequency technology	6-1
References	6-3
7 Intense focused ultrasound	7-1
References	7-2

8	Low-level light therapy (LLLT)	8-1
8.1	Introduction to LLLT	8-1
8.2	LLLT for skin rejuvenation	8-2
	References	8-4
9	Conclusions and future directions	9-1

Acknowledgements

It has taken more than two years and considerable effort to complete this book. I would like to express my gratitude to all who helped me.

Special thanks should be given to Professor Michael R Hamblin, for his constant advice and encouragement of my research into photomedicine in the United States, and his guidance through the process of writing this book. Without his consistent and illuminating instruction, this book would not have reached its present form.

Second, I would like to express my heartfelt gratitude to my colleague—Qiquan Chen who devoted much of his time to checking the references.

I would also like to give my thanks to my beloved family for their love and great confidence in me through the years.

Finally, I appreciate the contribution of the Production team at IOP Publishing.

Rui Yin

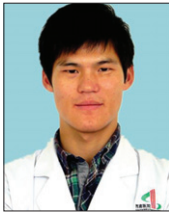

Author biographies

Rui Yin

Rui Yin, MD, PhD is an associate professor of dermatology at Southwest Hospital, Third Military Medical University, and a visiting associate professor of the Wellman Center for Photomedicine at Massachusetts General Hospital. Her research interests lie in the areas of photodynamic therapy and laser therapy for photoaging and skin aging. She has published 20 peer-reviewed articles in English, over 40 peer-reviewed articles in Chinese, over 30 conference proceedings and two book chapters. She is a reviewer for seven journals and serves as a grant reviewer for the National Natural Science Foundation of China. She is also a committee member of the China Dermatologist Association and the China Medical Association. In 2011, Dr Yin was honored as one of Top Ten National Outstanding Young Dermatologists by the China Dermatologist Association.

Qiquan Chen

Qiquan Chen, MD is a resident doctor in the Department of Dermatology, Southwest Hospital, Third Military Medical University, Chongqing, People's Republic of China. His interests currently focus on the immunological mechanisms of phototherapy treatment in cancer therapy.

Michael R Hamblin

Michael R Hamblin, PhD is a principal investigator at the Wellman Center for Photomedicine, Massachusetts General Hospital, an associate professor of dermatology, Harvard Medical School and the affiliated faculty of Harvard–MIT Division of Health Science and Technology. He directs a laboratory of around twelve scientists who work in photodynamic therapy and low-level light therapy. He has published 274 peer-reviewed articles, is associate editor for eight journals and serves on NIH study sections. He has edited ten proceedings volumes, together with four other major textbooks on PDT and photomedicine. In 2011 Dr Hamblin was honored by election as a Fellow of SPIE.
