ERRATUM

In the Letter "Proper Motions of Ionized Gas at the Galactic Center: Evidence for Unbound Orbiting Gas" by F. Yusef-Zadeh, D. A. Roberts, and J. Biretta (ApJ, 499, L159 [1998]), the declination axis to the left in Figure 1 and the gray-scale numbers to the right in this same figure were omitted. Figure 1 with both axes and all numerical values is reprinted here.

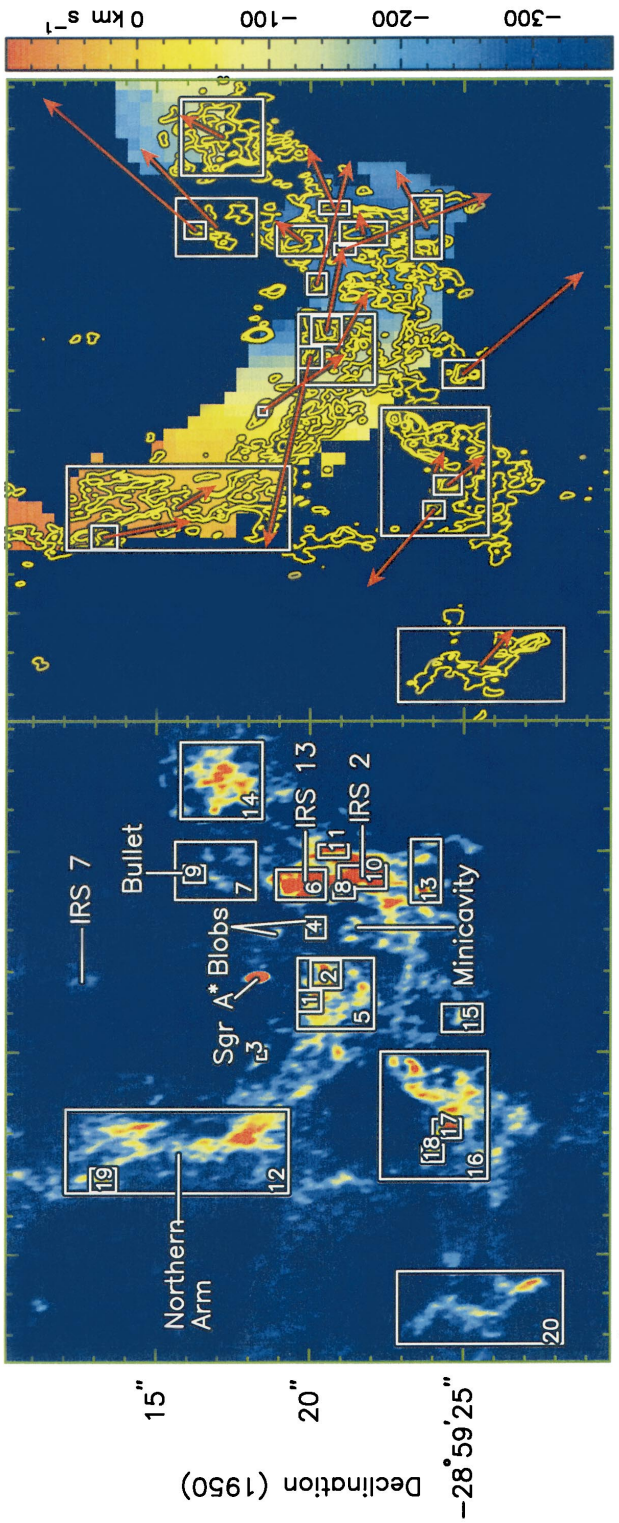

FIG. 1.—*Left:* Pseudocolor image of the $\lambda = 2$ cm continuum from the 1990 epoch data with a resolution of 0.″1 × 0.″2 and an rms noise of 0.104 mJy beam^{-1}. The boxes (see Table 1), except box 21, are regions in which proper-motion measurements have been carried out with a greater than 3 σ level detection in at least one direction. *Right:* H92α velocity distribution with spectral and spatial resolutions of 14 km s^{-2} and 0.″75 × 1.″2 presented in pseudocolor with contours of the $\lambda = 2$ cm continuum image superposed. The length and direction of the vectors represent the transverse velocity in each box. The velocity and uncertainty of each vectors are presented in cols. (6) and (7) of Table 1. This image and the previously published image are identical except that the missing velocity and declination axes noted to the right and left sides of the image were missing in the previously published color figure.
