## PREFACE

It is our great pleasure to welcome all of you to 2020 2<sup>nd</sup> International Conference on Resources and Environment Sciences (ICRES 2020), June 5-7, 2020 in Kasetsart University, Bangkok, Thailand. ICRES 2020 is dedicated to issues related to Resources and Environment Sciences. Due to the COVID-19 pandemic, the conference committees made a decision to hold an online conference instead to ensure every participant's personal safety.

ICRES 2020 has received 50 submissions (full papers and abstracts) and only 20 full papers and 2 abstracts were accepted based on the anonymously reviewed results from the technical committee members. Only the outstanding submissions were chosen to be presented during the conference.

This volume of the proceedings presents a selection of papers submitted to the conference. They are organized in 6 chapters under the topics of: Solid Waste Management and Scientific Research, Biodiversity and Pollution Ecology, Wastewater Treatment Technology, Natural Resources Development and Management, Building Environment, Environmental Chemistry and Disaster Management. All papers were subjected to peer-review by conference committee members and international reviewers. The papers were selected based on the criteria of high quality and relevance to the conference theme.

We express our sincere appreciation to the organizing committee and the volunteers who had spent their time, effort and help on planning, promoting, and organizing the conference.

Prof. Natalia Bakhtadze

V.A. Trapeznikov Institute of Control Sciences, Moscow, Russia
